Jennifer L. Peeples holds a M.S. in Aerospace Engineering and has been using Adams for over 17 years. Her background as a former U.S. Army Blackhawk test pilot led her to pursue an interest in NVH (Noise, Vibration, and Harshness) engineering at Bosch, where she first used Adams to solve vibration problems with brake systems. Since then, she has applied Adams to problems in many different fields, including aerospace, weapons design, biomechanics, and the energy sector. She lives and works in Austin, TX.
